<sup>2</sup> Affiliation of Author2, Address

E-mail: author@xxx.yy, author2@xxx.yy

## Abstract

Each article must include an abstract of 150 to 200 words. This short abstract will also be used for printing a Booklet of Abstracts containing the abstracts of all papers presented at the Conference.

**Keywords:** provide 3–5 keywords; separated; by semicolons

## 1. Heading 1

Articles must be between 25,000 and 50,000 characters (with spaces) in length, regardless of the mode of presentation (oral, demo or poster).

## 2. Headings/Level Headings 1

Should be capitalised in the same way as the main title, and centred.

### 2.1 Headings 2

#### 2.1.1 Headings 3

## 3. Tables and Figures

“Figure” and “Table” should not be abbreviated as “Fig.” and “Tab.”. The captions should not include full stop at the end. Use non-break space between “Figure” (“Table”) and the number.

Large figures can be centred, using a full page.

The instructions for tables are similar as for figures. Table format is optional, below is an example from 2015 eLex proceedings.

## 4. Footnotes

Footnotes are indicated within the text by a number in superscript<sup>1</sup>. The authors should avoid using long footnotes, e.g. extending over half a page; in such cases, it is better to implement the footnote in the main text

## 5. References in the text

All references within the text should be placed in parentheses containing the author’s surname followed by a comma before the date of publication (Martin, 1996). If the sentence already includes the author’s name, then it is only necessary to put the date in parentheses: Martin (1996). When several authors are cited, those references should be separated with

<sup>1</sup> Footnote 1

Direct user contributions	Indirect user contributions	Accessory user contributions
<ul style="list-style-type: none"> <li>• Contributions to open-collaborative dictionaries</li> <li>• Contributions to collaborative-institutional dictionaries</li> <li>• Contributions to semi-collaborative dictionaries</li> </ul>	<ul style="list-style-type: none"> <li>• Explicit feedback <ul style="list-style-type: none"> <li>– form-based feedback</li> <li>– free form feedback</li> </ul> </li> <li>• Implicit feedback <ul style="list-style-type: none"> <li>– log file analysis</li> <li>– external user-generated content</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>• Exchange between dictionary makers and dictionary users <ul style="list-style-type: none"> <li>– unidirectional communication</li> <li>– bidirectional communication</li> </ul> </li> <li>• Exchange among dictionary users</li> </ul>

Table 1

a semicolon: (Martin, 1996; Chibout & Masson, 1995). When the reference has more than three authors, only cite the name of the first author followed by et al.

All this should be achievable with the default BibTeX settings. Use commands `citet`, `citep` and `citealp`.

## 6. Acknowledgements

Place all acknowledgements (including those concerning research grants and funding) in a separate section at the end of the article.
